

As a taxpayer and XM customer, I can see no legal or business constraint which should legitimately prevent XM radio from providing me local weather, traffic, etc. If the NAB members have a better product to offer, let them compete for my business fairly. Trying to stifle competition is anti-business and anti-taxpayer, if you get my drift... Come on folks, you're supposed to take care of the citizen, not protect lobbyists and their interests - it never works in the long run, anyway...
